Dear Harold,

Your recent writings recalling events with ~~of~~ your friends and acquaintances e.g. Sidney Kaufman, in the light of your career and struggles with the OSS, CIA, FBI etc I found most fascinating.

In fact, suddenly an idea exploded in my mind! What a great book it would make! A best seller! A book telling the struggles of one man against the FBI, Justice Dept. Government spying on their citizens. Government lying to their people. You have a goldmine of facts stored on files and in your computer mind being wasted and given away.

It suddenly occurred to me that you should write another book telling your life's experience.

Not another "WHITEWASH", cover-up.
I visualize a "believe it or not" book
telling (exposing?) what the Government
does behind the back of its citizens—
you, as an example of other Thousands.
When the idea hit me, I mentioned it
to Sam. Sam thought it a good idea,
and gave it a title "I AND THE FBI".
Harold, you must not fritter away
your time and experience writing
all that stuff & falling on deaf ears.
If you write the kind of book I have
in mind, I'll help you publish it.
I even discussed it with Sam
if he would collaborate with you.
You have the facts and the ability
to write voluminously. Sam has a way
of playing with words and make them
appeal to readers. The two of you
can create a "best seller. I am willing
to help financially. It's ~~an idea~~ a book whose time has come,
what do you think?
I asked Sam to follow-up with you.
So let's us 3 musketeers do something
adventurous, before it's too late. Shalom!!

Joe.
